# Release notes

Summary

This document contains the updates included in the Patient application version 1.224 and Clinic version 4.193. There are no updates on the Medical content or Manage in this release. The changes are expected to be launched to production on the 24th of September.

Patient application

Changes in version 1.224

| 1	Information about how long the async communication is open

Information about how long the started async communication is open is now displayed on the activity card when there are no unread messages. When the async communication is finished, information about when the communication was ended will be displayed.

The left image shows the addition of the information on how long the async communication is open (when there are no unread messages). The right image shows information about unread messages, and then the information about how long the communication is open is not visible.

2 Titles for measurements added to the graph view for remote patient monitoring

Titles for measurements have been added to clarify which measurement is being referred to in the graph view for remote patient monitoring.

The left image shows what it looked like before the change and the right image after the change.

Clinic

Changes in version 4.193

1	**New questionnaires for obesity and specialist maternity care have been added as remote patient monitoring (RPM) activities**
	The *Register Diet* questionnaire for obesity has been made available as an RPM activity. Additionally, the *Wellbeing questionnaire* for maternity care has been added as an RPM activity. To activate these questionnaires, they need to be configured. Please contact your Customer Success Manager if you wish to add them.

Observe!

What is included in the release notes is what is intended to be released. Be aware that the development is currently under regression testing and have to pass the tests in order to be released. Therefore, if a change is made to the release that will affect what is written in the release notes, a new version of release notes will be communicated.

Questions

If you have any questions, please contact Platform24 Support or your Customer Success Manager.
