Release notes

Summary

This document contains the updates included in Clinic version 4.195, the Medical content version 1.128 and Metabase. There are no updates in the Patient application or Manage in this release. The changes are expected to be launched to production on the 8th of October.

Clinic

Changes in version 4.195

1 Triggered questionnaires are visible in the measurement graph for remote patient monitoring, and new look for questionnaires in the graphs

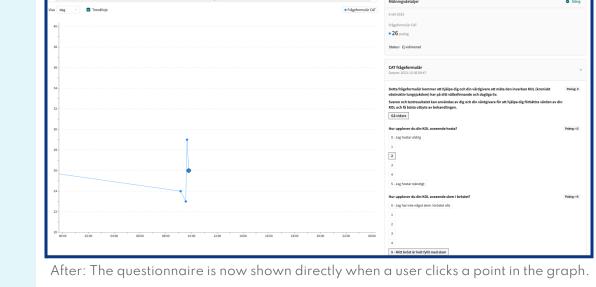

Some care plans have automatic events configured to automatically trigger a questionnaire for the patient. An example is a heart failure questionnaire that is automatically triggered if a heart failure patient experiences a rapid weight gain. Previously, the result from the measurement (in this case, the weight) and the questionnaire were displayed in two separate graphs. Now, the questionnaire will appear in the measurement graph that triggered the questionnaire (in this example, in the weight graph). Note that the questionnaire will still appear in its own graph to allow the questionnaire's trend to be tracked separately, just as before. The appearance of questionnaires in general has also been adjusted so that questionnaire responses are displayed directly when the user clicks on a point in the graph. Previously, healthcare personnel had to click "See questionnaire answers" to view the responses. See images in Swedish below.

Medical Content

Changes in version 1.128

Medical content populating the Triage product

The following changes apply directly upon release for all customers who use the questionnaires mentioned.

1	Exit added in the questionnaire <i>bite tick</i> To improve safety an exit has been added in the questionnaire <i>bite tick</i> . It concerns a tick that cannot be removed, which should at least give the urgency level "acute".
	Platform24 Är det möjligt att ta bort fästingen? Ja Nej Question about tick removal in the questionnaire <i>bite tick,</i> in Swedish.
2	Options added in the questionnaire <i>urinary</i>
	Two options are added in the questionnaire <i>urinary</i> , concerning diagnoses for anatomical abnormalities of the urinary tract and neurological diseases affecting bladder emptying.

Njurbäckeninflammation	
Anatomisk avvikelse i urinvägarna	
Neurologisk sjukdom som påverkar blåstömningen	
Inget av ovanstående	
New options in the questionnaire <i>urinary,</i> in Swe	dish.
— Vad menar vi med svarsalternativen?	
Njurbäckeninflammation är en urinvägsinfektion s spridit sig till en eller båda njurarna.	som
Neurologisk sjukdom som påverkar blåstömning innebär en sjukdom som gör det svårare för kropper kontrollera när och hur du kissar. Detta kan leda till har svårt att tömma blåsan helt eller att du har läck	n att att du
Anatomisk avvikelse i urinvägarna betyder att det en skillnad i hur dina urinvägar är uppbyggda jämfö med vad som är normalt, vilket kan påverka hur urin	rt

3 Improvement in the questionnaires *gi* and *rectal*

An improvement has been made in the questionnaires *gi* and *rectal*, to facilitate the triage for rectal leakage with suspected neurological cause. When choosing rectal leakage the patient is then able to choose among the neurological symptoms shown in the picture below; reduced feel in the genital area, problems with bladder emptying and back pain.

Metabase

1	Dashboard: Evaluation of the Standard report This fall, we are working on improvements of the Standard Reports in Metabase. To gather user needs and feedback, there is a link to a form below for the users to fill in below. Anyone working in Metabase and using the Standard report is welcome to participate in this evaluation.
	Link: <u>Form</u>
2	Dashboard+: Updates in Efficiency and Ratings report All customers who have Dashboard+ in Metabase included in their contract and have the "Efficiency and Rating" report will automatically receive the following updates:

- A new filter at the top of the report that allows filtering by *Search* reason
- In the *Per Meeting* card, the following columns are added for each meeting:
 - Date when the meeting was placed in the queue.
 - How many days passed between the patient entering the queue and the meeting being completed

Observe!

What is included in the release notes is what is intended to be released. Be aware that the development is currently under regression testing and have to pass the tests in order to be released. Therefore, if a change is made to the release that will affect what is written in the release notes, a new version of release notes will be communicated.

Questions

If you have any questions, please contact Platform24 Support or your Customer Success Manager.
