

# Release notes

## Summary

This document contains the updates included in Clinic version 4.202 and the Medical content version 1.134. There are no updates on the Patient application or Manage in this release. The changes are expected to be launched to production on the 26th of November.

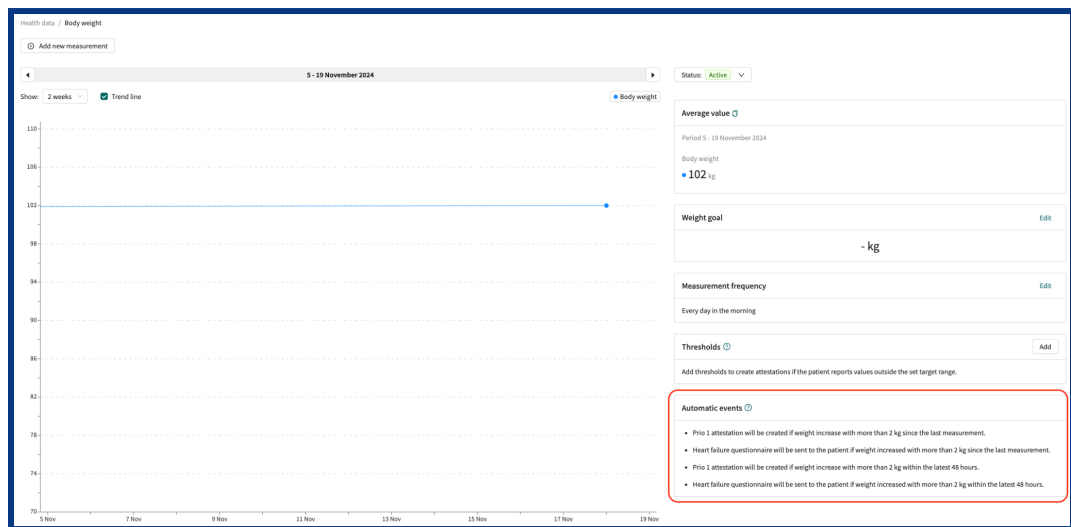

## Clinic

### Changes in version 4.202

#### 1 Show active automatic events within Remote Patient Monitoring (MDR)

**MD**

With this change, the automatic events that are activated for a patient are displayed to provide increased transparency for healthcare practitioners. The automatic events are set per care plan and applied to each patient enrolled in the care plan. If automatic events have been activated, they are displayed next to the corresponding graph in the graph view. (See image)

The automatic events are shown next to the corresponding graph.

## Medical Content

### Changes in version 1.134

#### Medical content populating the Triage product

The changes apply directly upon release for all customers who use the questionnaires mentioned.

#### 1 Exits added for children younger than 6 months with fever cramps

To improve safety, exits have been added for children younger than 6 months old with suspected first time seizure due to fever. The changes are made in the questionnaires *fever condition* and *library infant cramps*.

Platform24

Har eller har ditt barn haft kramper i samband med feber?

— Vad är feberkramp?

En del barn som har feber kan i samband med febern få ett krampanfall. Krampanfall i samband med feber kallas för en feberkramp.

Ja

Nej

Fortsätt

Question about fever cramps in the questionnaire *fever condition*, in Swedish.

## 2 Improvement in the questionnaire *genital male female*

An improvement has been made to ensure that girls aged 6 years or younger, receive appropriate triage outcomes when experiencing genital discharge-related issues. The change has been done in the questionnaire *genital male female*.

## Observe!

What is included in the release notes is what is intended to be released. Be aware that the development is currently under regression testing and have to pass the tests in order to be released. Therefore, if a change is made to the release that will affect what is written in the release notes, a new version of release notes will be communicated.

## Questions

If you have any questions, please contact Platform24 Support or your Customer Success Manager.
