# Release notes

Summary

This document contains the updates included in the Medical content version 1.135 and the Patient application version 1.234. There are no updates on Clinic or Manage in this release. The changes are expected to be launched to production on the 3rd of December.
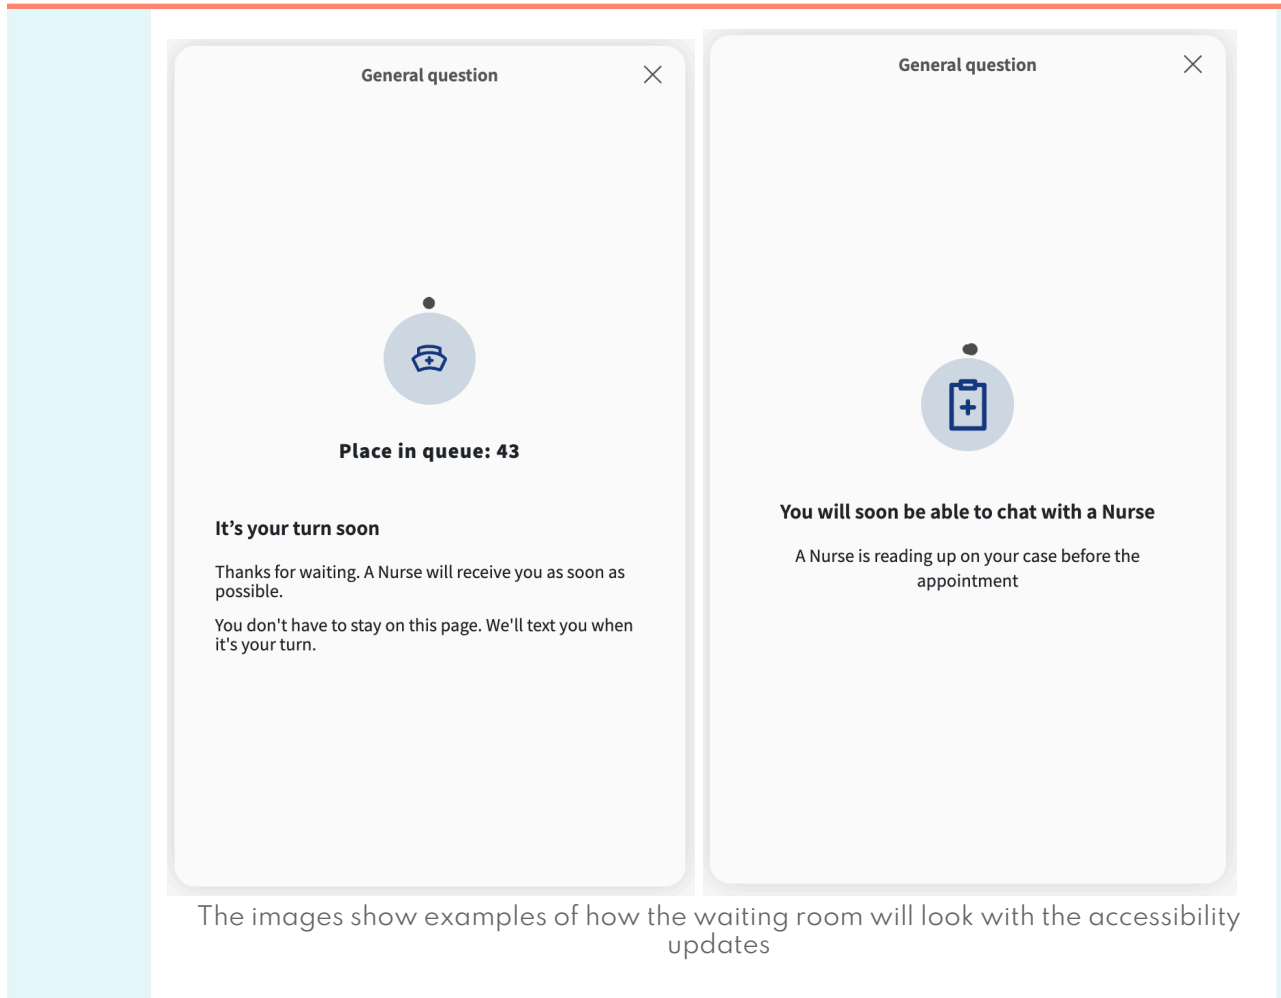

Patient application

Changes in version 1.234

1	Accessibility adoptions for the patient waiting room
	The design in the waiting room for drop-in and scheduled appointments has been updated to be more accessible, but also more consistent throughout the steps the patient goes through.

General question ✕

Place in queue: 43

It's your turn soon

Thanks for waiting. A Nurse will receive you as soon as possible.

You don't have to stay on this page. We'll text you when it's your turn.

General question ✕

You will soon be able to chat with a Nurse

A Nurse is reading up on your case before the appointment

Medical Content

Changes in version 1.135

Other changes in medical content

1	Extended possibilities to send patients to psychologists
	Via the questionnaires *stress* and *insomnia*, there are now extended possibilities to send patients to psychologists, with capability psychology.
	The change applies upon release for all customers who use the questionnaires mentioned.

Observe!

What is included in the release notes is what is intended to be released. Be aware that the development is currently under regression testing and have to pass the tests in order to be released. Therefore, if a change is made to the release that will affect what is written in the release notes, a new version of release notes will be communicated.
