

# Release notes

## Summary

This document contains the updates included in the Medical content version 1.136. There are no updates on the Patient application, Clinic or Manage in this release. The changes are expected to be launched to production on the 10th of December.

## Medical Content

### Changes in version 1.136

#### Other changes in medical content

##### 1 New recommendation texts

The new recommendation texts that were added in release 1.132 are now also included on the recommendation page, with a slight reformulation; the text “The recommendation on the next page is based on” is replaced with “The recommendation is based on”.

Exits with urgency level “Wait” are not affected by this change.

Exits with any other urgency level that already have a recommendation text are not affected. These will be handled separately.

The change applies directly upon release for all customers, except for those with partner-specific questionnaires.

## **Observe!**

What is included in the release notes is what is intended to be released. Be aware that the development is currently under regression testing and have to pass the tests in order to be released. Therefore, if a change is made to the release that will affect what is written in the release notes, a new version of release notes will be communicated.

## **Questions**

If you have any questions, please contact Platform24 Support or your Customer Success Manager.
