

Release notes

Summary

This document contains the updates included in the Patient application version 1.242, Clinic version 4.212 and the Medical content version 1.142. There are no updates on Manage in this release. The changes are expected to be launched to production on the 18th of February.

Patient application

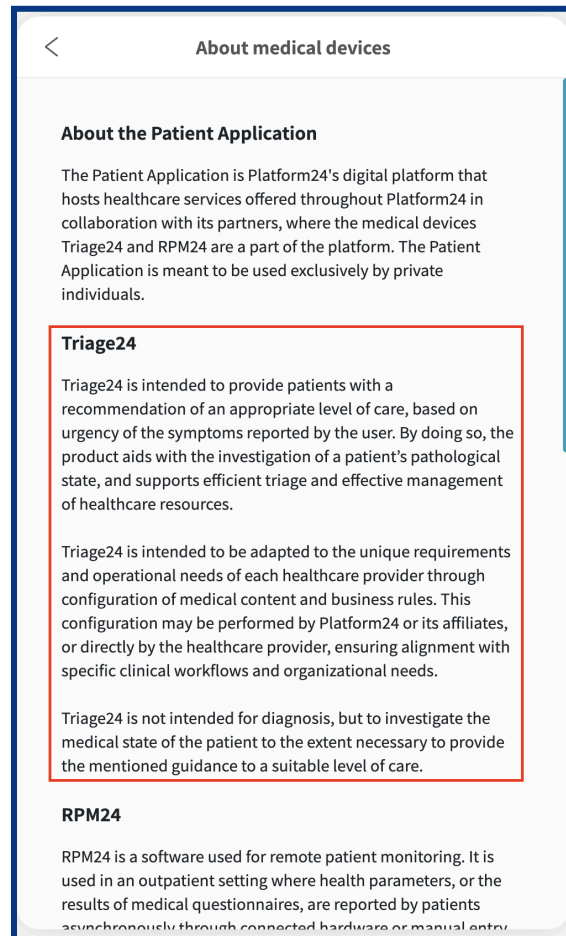

Changes in version 1.242

1 Updated information about Triage24 MDR product

MD

The information about the MDR Triage24 product on the *About Medical Devices* page in the *Support* menu has been updated.

The text is now supported in the following languages: Swedish, English, Danish, Dutch, German and Norwegian.

Updated text about the MDR Triage24 product

2 New text field on *Feedback and support* page

We have added a new optional text field to the *Feedback and support* page. The purpose of the text field is for the customer to be able to provide more information to patients about the feature and what type of feedback that can be sent in.

Contact your Customer Success Manager to add text to the text field (optional) in the languages supported by your Patient application.

Clinic

Changes in version 4.212

1 Updated design of child label

The label indicating that the patient is a child has a new design to align with other labels on the new pages of the main menu.

The label is shown on the same pages and with the same logic: the label is displayed when a guardian is acting on behalf of their child and is only shown for customers that have relationship check activated.

Medical Content

Changes in version 1.142

Medical content populating the Triage product

1 Free-text questions moved post-triage in the questionnaire *recurringHeadache*

Adjustments have been made in the questionnaire *recurringHeadache*. Anamnesis-gathering free-text questions that were not asked for triaging purposes have been moved post-triage. The question in the picture is an example that is shown post-triage if you answer that you have a diagnosis but then negate all examples given.

The screenshot shows a mobile application interface for Platform24. At the top left, there is a logo with a speech bubble icon and the text 'Platform24'. Below the logo, a light pink message bubble contains the text: 'Du uppgav tidigare att du har en fastställd huvudvärksdiagnos, men inte någon av de diagnoser som har efterfrågats. Vilken diagnos har du fått?'. Below the message bubble, the text 'Skriv ditt svar' is displayed above a white text input field with rounded corners. At the bottom of the screen, there is a red button with the white text 'Fortsätt'.

Free-text question post-triage in the questionnaire *recurringHeadache*, in Swedish.

The changes apply directly upon release for all customers, except for those with partner-specific questionnaires.

Observe!

What is included in the release notes is what is intended to be released. Be aware that the development is currently under regression testing and have to pass the tests in order to be released. Therefore, if a change is made to the release that will affect what is written in the release notes, a new version of release notes will be communicated.

Questions

If you have any questions, please contact Platform24 Support or your Customer Success Manager.
