Release notes

Summary

This document contains the updates included in Clinic version 4.216 and the Medical content version 1.146. There are no updates on the Patient application or Manage in this release. The changes are expected to be launched to production on the 18th of March.
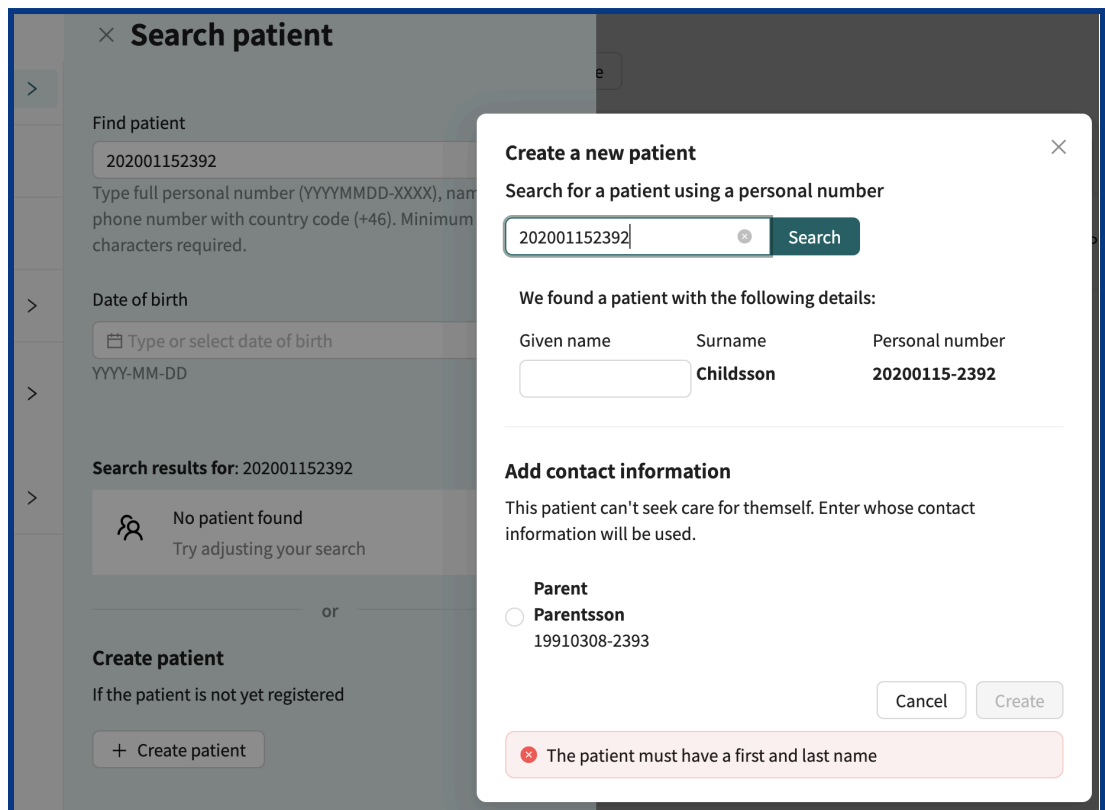

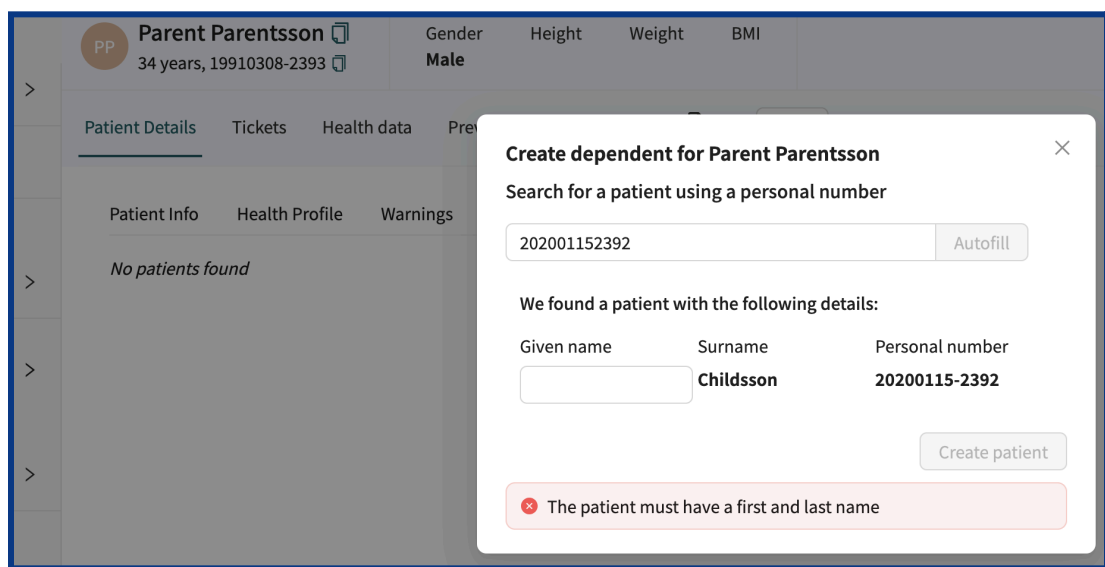

Clinic

Changes in version 4.216

1	Possibility to enter given name when there is none registered
	It is now possible to fill in the given name of a patient if there is none registered in the population registry, if there is a population registry integration set up. This is mainly beneficial for newborn patients that have yet to acquire a given name.
	(The names and personal identity numbers shown are fictitious and do not represent real individuals.)

Medical Content

Changes in version 1.146

Medical content populating the Triage product

1 **Improvements in the questionnaires *earSymptoms* and *earache***

Improvements have been made in the questionnaires *earSymptoms* and *earache* to better align with RGS:

- The alternative "bluish swelling on the outer ear" can now be chosen also when you have had ear trauma, which was not the case before.
- The alternative "blue-red lump on the earlobe" can now be chosen as a stand-alone symptom and now also has its own exit with the urgency level "Planned" according to RGS.

The changes apply directly upon release for all customers, except for those with partner-specific questionnaires.

The alternatives "bluish swelling on the outer ear" and "blue-red lump on the earlobe" in the questionnaire *earSymptoms*, in Swedish.

Other changes in medical content

1 Refinement of psychiatric capability

The psychiatric capability has been reviewed and refined in outcomes where a psychiatric emergency department may be more appropriate than a general emergency department.

The changes apply to all customers that define this capability in their business rules.

Observe!

What is included in the release notes is what is intended to be released. Be aware that the development is currently under regression testing and have to pass the tests in order to be released. Therefore, if a change is made to the release that will affect what is written in the release notes, a new version of release notes will be communicated.

Questions

If you have any questions, please contact Platform24 Support or your Customer Success Manager.
