Release notes

Summary

This document contains the updates included in Clinic version 4.222. There are no updates on the Patient application, Manage or the Medical content in this release. The changes are expected to be launched to production on Wednesday the 23rd of April.

Clinic

### Changes in version 4.222

1   Improvements in the calendar

These changes are only relevant for customers and users that have the calendar enabled in Clinic.

We have done several changes to improve the user experience when working in the calendar:
1. Improved navigation and filtering
2. Practitioner side-by-side comparison
3. Updated design of time slots
4. Updated design of tags

**1. Improved navigation and filtering**
- A. Show calendars for several practitioners simultaneously
- B. Navigate directly to a specific date
- C. Possibility to see calendar view 1 day, 5 days or a full week

Improved navigation and filtering in the calendar

2. Practitioner side-by-side comparison

We have added support for side-by-side comparison of practitioner calendars to enable improved overview of your colleagues' workdays. This view is shown by selecting several practitioners (1A) and then changing the view to display 1 day (1C).

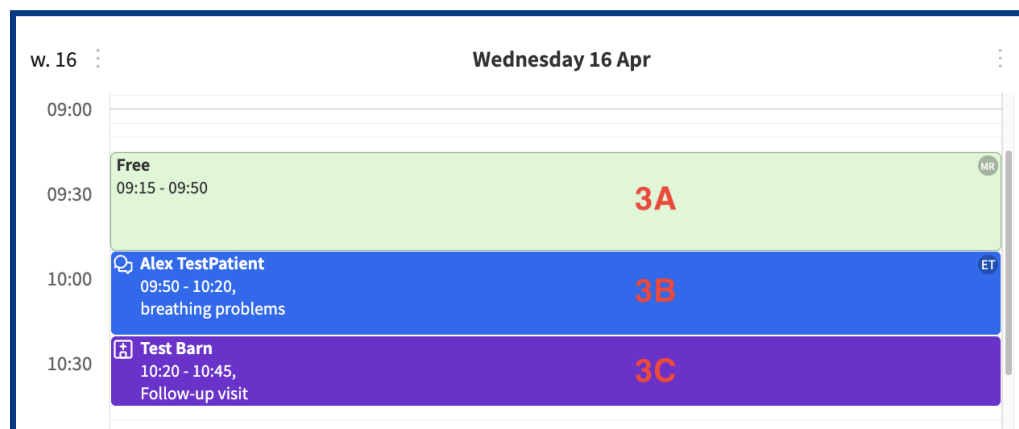

Practitioner side-by-side view

3. Updated design of time slots

We have improved the design of the time slots including making them more accessible by adding more colors, icons and information. The slots in the calendar can be divided into three options:

A. Free time slot (green)
B. Scheduled digital meeting (blue)
C. Scheduled physical meeting (purple)

In addition:

- If a practitioner is assigned to a time slot or scheduled meeting, the practitioner's initials are displayed in the top right corner.
- For scheduled meetings, the patient name and condition are shown on the time slot for improved overview.

Updated design of time slots

4. Updated design of Tags

These changes are only relevant for customers who have tags enabled in the calendar view.

With the updates of time slots design, we have also updated tags to work with the new design and also make these more accessible. The tag colors are updated to work with the new time slot design and they now also cover the full time slots height to make it easier to find in the calendar.

Updated design of tags

Observe!

What is included in the release notes is what is intended to be released. Be aware that the development is currently under regression testing and have to pass the tests in order to be released. Therefore, if a change is made to the release that will affect what is written in the release notes, a new version of release notes will be communicated.

Questions

If you have any questions, please contact Platform24 Support or your Customer Success Manager.
