

Release notes

Summary

This document contains the updates included in the Patient application version 1.253 and the Medical content version 1.150. There are no updates on Clinic or Manage in this release. The changes are expected to be launched to production on the 6th of May.

Patient application

Changes in version 1.253

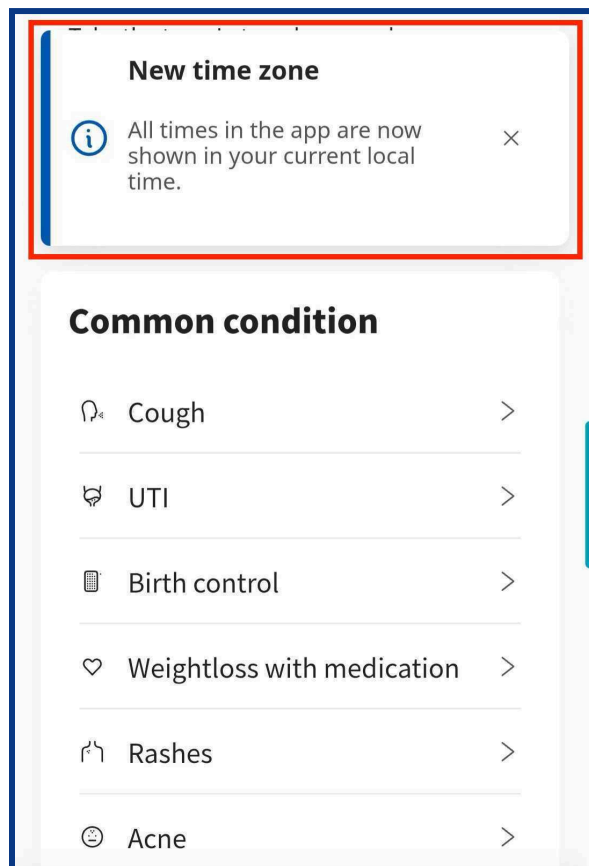

1 Time zone notification and local time display for patient activities

To keep patients informed about the time of their activities during travel, a notification will now show on the start page of the Patient app when the time zone changes compared to the time zone of the care provider.

- The notification will show to a patient when located in a time zone different from the care provider's time zone and all dates and hours of their activities will be adjusted to reflect the new time zone.
- The notification will not show for patients which are located in the care provider's time zone.
- The notification will show each time there is a change in the patient's time zone.
- Once displayed and dismissed by the patient, the notification will not show again until a new time zone is detected.

Example: A Swedish patient travels to Japan. A notification shows up in the Patient app and all activities are displayed in the Japanese time zone when the patient uses the app from Japan. For the duration of stay in the Japanese time zone, the notification is not displayed.

When the same patient travels from Japan to Germany, the notification is displayed again and the date and time of the activities are displayed in the German time zone when the patient uses the app in Germany.

Medical Content

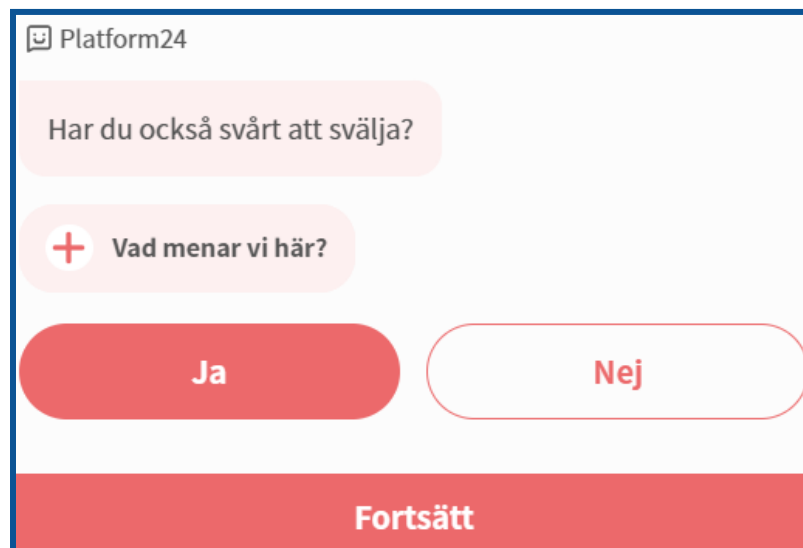

Changes in version 1.150

Medical content populating the Triage product

1 Improvement of the questionnaire *soreThroat*

The *soreThroat* questionnaire has been completely revised and improved to include more content and questions for patients with difficulty swallowing, after a previously reported incident.

The change applies directly upon release for all customers, except for those with customer-specific questionnaires.

The screenshot shows a mobile app interface for Platform24. At the top, there's a header with the Platform24 logo. Below it, a question is displayed: "Har du också svårt att svälja?". Under the question, there's a plus icon followed by the text "Vad menar vi här?". At the bottom of the question area, there are two buttons: "Ja" (Yes) and "Nej" (No). Below these buttons is a red bar with the text "Fortsätt" (Continue).

Questions about difficulty swallowing in the questionnaire *soreThroat*, in Swedish.

Questions about sudden difficulty swallowing in the questionnaire *soreThroat*, in Swedish.

Observe!

What is included in the release notes is what is intended to be released. Be aware that the development is currently under regression testing and have to pass the tests in order to be released. Therefore, if a change is made to the release that will affect what is written in the release notes, a new version of release notes will be communicated.

Questions

If you have any questions, please contact Platform24 Support or your Customer Success Manager.
