

Release notes

Summary

This document contains the updates included in the Medical content version 1.156. This document also contains information about an updated User Manual relating to Manage. There are no updates on the Patient application or Clinic in this release. The changes are expected to be launched to production on the 19th of August.

Medical Content

Changes in version 1.156

Medical content populating the Triage product

1 Improvements in the questionnaire *fatigue*

Improvements have been made in the questionnaire *fatigue* to lessen over-triage. Among other things, the question about sudden fatigue has been moved to the end of the questionnaire and specified with a follow-up question about whether one is able to perform simple tasks. To increase safety, several new exits have also been added, regarding, among other things, breathing difficulties and neurological symptoms.

The changes apply directly upon release for all customers, except for those with partner-specific questionnaires.

Manage

Updated User Manual

1 New version of the Manage User Manual

A new version (9.0) of the Manage User Manual is now available.

All user manuals are available from within the user interface and on our webpage: <https://platform24.com/manuals>

The screenshot displays the Platform24 Manage user interface. On the left is a sidebar menu with the following items: 'Healthcare organization', 'Patient apps', 'Users', 'Medical content' (highlighted with a right arrow), 'Business rules', 'Care pathways', a user profile for 'Helena Testsson', 'About' (circled with an orange '1'), 'Troubleshooter', 'Collapse Menu', and 'Logout'. The main content area on the right contains a list of three items: 'Alerts to the treating practitioner with varying priority levels.', 'Presentation of configured messages, prompts and requests for action to the patient.', and 'Representation of values, or the trends in values, in relation to the limits of acceptance over time using visualizations and written messages.' Below this is a paragraph about 'Smart Care Plans' and another about the patient interface. Further down are CE and MD certification logos, UDI numbers for 'Triage24' and 'Smart Care Plans', and version information for 'Triage24 Medical Device Version 1', 'Smart Care Plans Medical Device Version 2', and 'Manage 3.147.0: staging'. At the bottom of the main area, there is a section for 'Consult instructions for use: eIFU' and a 'Link to User Manuals' button (circled with an orange '2'). The footer includes the date 'Triage24: 2022-11-01', 'Smart Care Plans: 2025-04-01', and the company name 'Platform24 Healthcare AB' with its address.

To access the user manuals in Manage, go to the *About* page (1) and click *Link to User Manuals* (2) at the bottom of the page.

Observe!

What is included in the release notes is what is intended to be released. Be aware that the development is currently under regression testing and have to pass the tests in order to be released. Therefore, if a change is made to the release that will affect what is written in the release notes, a new version of release notes will be communicated.

Questions

If you have any questions, please contact Platform24 Support or your Customer Success Manager.
