Release notes

Summary

This document contains the updates included in the Medical content version 1.157. There are no updates on the Patient application, Clinic or Manage in this release. The changes are expected to be launched to production on the 26th of August.

Medical Content

Changes in version 1.157

Medical content populating the Triage product

The changes apply directly upon release for all customers, except for those with partner-specific questionnaires.

1	**Updates in the questionnaire *bruise*** Updates have been made in the questionnaire *bruise* to conform with RGS updates. Among other things, the flow of the questions has been changed to be more user-friendly and to improve patient safety. An exit has also been added for patients with vision problems or eye pain.
2	**Improvements in the questionnaires *arm* and *neurological*** Changes have been made in the questionnaires *arm* and *neurological*, to improve the triage for patients with neurological symptoms.

3 Update in the questionnaire *shoulder*

A minor update has been made in the questionnaire *shoulder* to conform with RGS updates for shoulder injuries. The urgency level for injuries with no clear improvement within 2 days has been lowered from "Acute" to "Planned".

Observe!

What is included in the release notes is what is intended to be released. Be aware that the development is currently under regression testing and have to pass the tests in order to be released. Therefore, if a change is made to the release that will affect what is written in the release notes, a new version of release notes will be communicated.
